Skin Rejuvenation

We all strive to keep our skin smooth and clear, but throughout the day our pores inevitably get clogged with dirt and dust. As a result people tend to buy new cleansers, moisturizers or serums to solve this problem, but have you ever thought about soaking in a spa for clearer skin?

The two thoughts might not normally go hand in hand, however, there is a system that can not only massage your muscles but leave you with clearer and rejuvenated skin.

This system is called MicroSilk[®], which consists of billions of oxygen-rich microbubbles that are small enough to enter your pores and remove impurities. Soaking in a MicroSilk[®] Spa is like giving your entire body a facial! The benefits can include increased hydration, enhanced skin cell growth, improved collagen strength, and it is shown to reduce scars and skin irritations. The negative ions are also known to improve serotonin levels and help the mind and body relax.

MicroSilk is not intended to cure conditions and individual results may vary.

This general information is not intended to diagnose or treat any medical condition or to replace your healthcare professional.
